## **DETAILED ACTION**

## Election/Restrictions

Newly submitted claims 7-8 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claim 8 is drawn to an embodiment not previously elected.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 7-8 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leng [US 6,525,283] in view of Rudolph et al. [US 6,013,884].

Leng discloses a switch structure of a steering wheel [1] at which open portions [2] are formed between an inner periphery of a rim [7] of the steering wheel and an outer periphery of a pad cover [5] of the steering wheel wherein at each of the open portions a switch assembly [figure 4] constituted by a plurality of switches [9, 10] are disposed arranged such that the switching assemblies are symmetrical and can be

Page 3

55].

Leng disclose the instant claimed invention except for end portions of the top

side of the switch assemblies being covered by switch buttons extending to an inner

periphery of the opening portions.

Rudolph et al. discloses a switch assembly for a steering wheel mounted within

an opening between the spokes of a steering wheel via mounts [14] having switch

buttons extending to an inner periphery of the opening portions.

It would have been obvious to one of ordinary skill in the art at the time the

invention was made to use the switch button design of Rudolph et al. for the switches of

Leng for the purpose of optimizing space usage and facilitating operation.

It would have been obvious to one of ordinary skill in the art at the time the

invention was made to use the mounting design of Rudolph et al. for the switch

structure of Leng, as modified, in order to support the switches.

Response to Arguments

Applicant's arguments with respect to claims 1-2 and 4-6 have been considered

but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in

this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lincoln Donovan whose telephone number is (571) 272-1988. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad can be reached on (571) 272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
